RESURRECTING THE LOST TORTOISES OF THE GALÁPAGOS

On Ecuador's famously biodiverse archipelago, genetic detective work revealed traces of a long-extinct species—and spurred an extraordinary effort at reintroduction.

40

THE DAREDEVILS WHO KEEP LAGOS MOVING

Commuters in Nigeria's megacity rely on motorcycle taxis called okadas. Now a ban has them hailing rides in defiance.

48

THE POTENT PROMISES (AND PERILS) OF MODERN CANNABIS

Widely available and largely destigmatized, today's pot is stronger than ever. Suddenly, users and doctors alike are grappling with what that means.

70

EUROPE'S WILY WANDERER

It's a golden age for the golden jackal, with climate change to thank.

72

FASHION HAS A NEW THING FOR SNAKES

Non-native pythons are wreaking havoc on the Everglades. One designer is glimpsing opportunity.

80

THE GREAT MOON RUSH

As NASA and a slew of private companies prepare to return humankind to the lunar surface, an otherworldly experiment in real estate development is just beginning.

100

WHAT KATRINA TAUGHT US

Twenty years after the hurricane, storm-proofing the Louisiana coast remains a colossal undertaking.

104

MOST OF THE SEAFLOOR IS ONE BIG MYSTERY

But a novel deep-submergence tool could help change that.

108

WILL MEXICO'S TRAIN OF THE FUTURE LEAVE ITS PAST BEHIND?

The new Tren Maya railway links ancient sites and modern cities on the Yucatan Peninsula, but it's demonstrating the environmental cost of economic promise.

131 *NEW FROM NATIONAL GEOGRAPHIC*

ON THE COVER By the end of the century, the surface of the moon could look drastically different from the desolate terrain Apollo-era astronauts explored.
