6 OUR WORLD / 12 IN FOCUS

16

THE OKAVANGO
GIVES UP
ITS SECRETS

For more than a decade, researchers have been honing new techniques to explore and study one of Africa's greatest river systems. The full scope of what they've found is only now coming into view.

36

WHAT RAINBOW
REPTILES CAN TEACH
ABOUT EVOLUTION

The many hues of Spain's Ibiza wall lizards might offer fresh insight into the mechanics of natural selection.

38

HOW THE
SAGRADA FAMÍLIA
REACHED FOR HEAVEN

A century after the death of its visionary architect, Antoni Gaudí, the world's tallest church is at last nearing completion in Barcelona.

54

A LEGENDARY
CHEESE'S SHOCKING
SECRET INGREDIENT

It's maggots! And the Sardinian delicacy is finding fans among traditionalists and the larva curious.

62

SEARCHING
FOR THE INCA'S
LOST CITADEL

A spate of big discoveries led archaeologists to look closer at a once neglected set of Andean ruins. Now their work is revealing intriguing details about Inca religious practices—and may solve a centuries-old mystery.

86

WHY ARE
CROP CIRCLES
EVERYWHERE?

How a deceptively simple innovation transformed much of the world's farmland into a dot matrix.

90

THE LAST
LIONS OF GIR

The protection of the world's only remaining Asiatic lions, in western India, is a conservation success story. But what happens when big cats outgrow a small sanctuary?

110

THE GREAT
BUTTERFLY FAKE-OUT

The facelike markings on some butterfly wings have evolved in ways we're only starting to understand.

112

LESSONS OF
A LANDSLIDE
DETECTIVE

Climate change is causing more frequent landslides worldwide. In Alaska, where the risk looms large, one iconoclastic geologist is on a mission to learn how to predict them.

134 FROM THE VAULT

ON THE COVER Atop a mesa in Andean Peru, the formerly overlooked archaeological site known as T'agrachullo is now thought to have been a jewel of the Inca Empire.
